

# ZUNAIRA FATIMA

Hyderabad, Telangana | +91 8106770537 | zunairafatimashafi@gmail.com | github.com/Zunairafatima9

---

## SUMMARY

Computer Science engineer focused on data, machine learning and AI, with hands-on experience in Python, SQL, data analysis, validation, pipelines, APIs and Azure AI.

## EDUCATION

**M.Tech in Computer Science & Engineering** — Stanley College | Pursuing

**B.E. in Computer Science & Engineering** — Methodist College of Engineering & Technology, Osmania University | 2022–2026 | CGPA 9.65

## EXPERIENCE

- **Data Analyst Intern — SmartBridge** | Sep–Oct 2025: Cleaned and analyzed datasets; built Power BI dashboards; applied preprocessing and validation.
- **Front-End Intern — AICTE/Edunet Foundation** | Aug–Sep 2025: Worked with React, Vite, CSS and JavaScript; gained API integration exposure.
- **Data Science Intern — CodeClause** | May–Jun 2025: Performed EDA, statistical modelling and validation; built Python/Pandas data pipelines and dashboards.

## SELECTED PROJECTS

- **AI Hybrid Railway Digital Twin** — XGBoost, Deep Q-Learning, SUMO. Achieved 91.4% scheduling accuracy; delay prediction MAE 0.33 min, RMSE 0.44 min.
- **Deepfake Detection** — TensorFlow, MobileNetV2, MTCNN. Achieved 95% validation accuracy and optimized TFRecord pipelines.
- **Global Food Production Analysis** — Python, Pandas, Power BI. Analyzed 60 years of FAO agricultural data and built interactive dashboards.
- **Vehicle Assistance App** — Java, Android Studio, Google Maps API. GPS assistance, SOS, EV/ICE support and service-center discovery.
- **IoT Water Quality Monitor** — C++, Arduino, TDS sensor, LCD. Real-time water quality monitoring.

## SKILLS

**Programming:** Python, SQL, C, C++, Java, JavaScript   **AI:** Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, XGBoost, NLP   **Tools:** Power BI, Tableau, Git, Azure AI, Firebase, Android Studio

## TRAINING & PUBLICATION

- Azure AI technical training covering language models, Generative AI, OCR, image analysis and multi-agent AI.
- A Review of AI-Driven Railway Traffic Management Using Digital Twin Technology — IJIREM, 2026.
